

Research Activity at a Glance

DIPC's scientific production and international impact continues to increase. During the last 18 years, the center has published a total of 3,344 ISI publications and has received more than 94,312 citations. In 2017, 292 scientific articles and one book chapter mean an increase of 42% in the number of publications since 2010.

In addition to doing research, DIPC's annual strategic agenda of actions foster exchange with scientists from around the world. Included in the program are Seminars by international experts which cover particular research topics, Workshops on specific subjects of interest, and the DIPC Schools and Courses which focus on learning particular skills.

Driving Force of DIPC's Research Activity: Our Highly Dynamic Community

The core of the DIPC Community is made up of local scientists as well as PhD students and postdoctoral researchers who come from other institutions to complete their training and hone their expertise with us. DIPC Associates are situated in other centers at different faculties of the University of the Basque Country and at the Materials Physics Center. Our scientists act as hosts for the large number of international visiting researchers and retain the scientific-technical knowledge locally which helps to develop long term DIPC research projects. Among the local host community, there are also Ikerbasque Researchers and Gipuzkoa Fellows.
