

Resource

DIPC Seminars 2006

11/01/2006

Dynamics of excited electronic states

M. Rohlfing (International University Bremen, Germany)

02/02/2006

Sub-Tg acoustic damping in simple oxide glasses: IXS (Inelastic x-rays scattering) and BLS (Brillouin light scattering) results

G. Guimbretière (Université de Montpellier, France)

03/02/2006

STM studies of water on Pd(111) and Ru(0001)

J. Iribas Cerdá (Centro de Materiales de Madrid-CSIC, Spain)

06/02/2006

Plasmon nano-optics: manipulating spatially and spectrally the optical near-field

R. Quidant (ICFO-Institut de Ciències Fotòniques, Barcelona, Spain)

10/02/2006

Single Molecules as Electronic Devices: towards its ab initio design

Y. García (Universidad de Alicante, Spain)

17/02/2006

Relaxation phenomena in interacting systems

M. Ortuño Ortín (Universidad de Murcia, Spain)

24/02/2006

Magnetic dipolar interactions in two-dimensional magnetite nanoparticle arrays

P. Zeijlmans van Emmichoven (Universiteit Utrecht, The Netherlands)

24/02/2006

Is there a higher-order mode coupling transition in polymer blends?

A. Moreno Segurado (Sapienza Università di Roma, Italy)

28/02/2006

Why we do science — a personal history

P. Lawrence (MRC Laboratory of Molecular Biology, Cambridge, United Kingdom)

01/03/2006

From segmental dynamics to bulk mechanics: molecular dynamics simulation of polymer glasses

A. Lyulin (Eindhoven University of Technology, The Netherlands)

02/03/2006

Recent advances in metamaterials

Sir J. Pendry (Imperial College London, United Kingdom)

06/03/2006

Insulators, metals and fractionalized states-Berry's phases and the Luttinger theorem

R.M. Martin (University of Illinois at Urbana-Champaign, USA)

14/03/2006

Ordered and Disordered Phononic Structures: The Layer-Multiple-Scattering Method and Applications

R. Sainidou (University of Athens, Greece)

20/03/2006

Magnetostriction and magnetism in strongly correlated systems

A. Del Moral Gamiz (Universidad de Zaragoza, Spain)

24/03/2006

Contacting single molecules with the STM: model systems for molecular electronics

L. Grill (Freie Universität Berlin, Germany)

06/04/2006

Inelastic Electron Tunneling Spectroscopy from First-Principles

M.L. Bocquet (Laboratoire de chimie, École normale supérieure de Lyon, France)

07/04/2006

Boron nitride nanomesh: a peculiar self-assembled nanostructure

M. Corso (Universität Zürich, Switzerland)

07/04/2006

Dynamics of vortices in nanostructured superconductors: ratchet effect and biological motors

J.L. Vicent López (Universidad Complutense de Madrid, Spain)

26/04/2006

Rutile(110) surface and low-dimensional structures of titanium oxides on Ni(110): first principles modelling and simulated STM imaging

G. Teobaldi (University of Liverpool, United Kingdom)

03/05/2006

Lattice dynamics of adsorbate-covered surfaces from first principles

R. Heid (Forschungszentrum Karlsruhe, Germany)

11/05/2006

Surface state scattering from adsorbed molecules

P. Ruffieux (EMPA, Thun, Switzerland)

12/05/2006

Understanding the dissociation of diatomic molecules within the DFT-ACFD formalism

Y. Pouillon (Université catholique de Louvain, Belgium)

15/05/2006

Small is different: physics and chemistry at the nanoscale

U. Landman (Georgia Institute of Technology, Atlanta, USA)

23/05/2006

Dynamical response and surface excitations in thin films

M. Sunjic (University of Zagreb, Croatia)

25/05/2006

London's Helium Arguments, and the Ground-State Liquid-Metal

N.W. Ashcroft (Cornell University, New York, USA)

26/05/2006

Giant magnetic anisotropy and tunnel-magneto-resistance of nanostructures at surfaces

H. Brune (École Polytechnique Fédérale de Lausanne (EPFL), Switzerland)

09/06/2006

Photoelectron diffraction in rare-gas clusters

D. Rolles (Lawrence Berkeley National Laboratory, USA)

13/06/2006

Atomic spectroscopy in noble metal surfaces

H. Petek (University of Pittsburgh, Pennsylvania, USA)

16/06/2006

Structure and dynamics of vitreous B₂O₃ and alkali borates: neutron scattering and computer simulations

M.A. Gonzalez Gonzalez

(Institut Laue-Langevin, Grenoble, France and Universidad de Zaragoza, Spain)

16/06/2006

Neutrons for material science

C. Mondelli (Institut Laue-Langevin, Grenoble, France)

23/06/2006

Scattering properties of dopants in silicon nanowires from first-principles

R. Rurali (Universitat Autònoma de Barcelona, Spain)

26/06/2006

Carbon Nanotubes as platforms for the design of sensors

E. Mendoza Gómez (Institut Català de Nanotecnologia, Bellaterra, Spain)

04/07/2006

In search of supersolid Helium

G. Benedek (Università degli Studi di Milano, Italy)

07/07/2006

Electromigration Forces on Ions in Carbon Nanotube Transistors

N. Wang (Universität Hamburg, Germany)

14/07/2006

Nanoelectromechanical structures: principles and applications in signal processing and molecular sensing

J. Bausells Roige (Centre Nacional de Microelectrònica-CSIC, Barcelona, Spain)

14/07/2006

Scaling in future semiconductor devices: challenges and opportunities at the intersection with nanotechnology

J.A. Maiz Aguinaga (Intel Corporation, USA)

21/07/2006

Phonons of Cu(111) and Cs/Cu(111)-

B. Hellsing (Chalmers and Göteborg University, Sweden)

28/07/2006

Excitons in Time Dependent Density Functional Theory

O. Pankratov (Universität Erlangen-Nürnberg, Germany)

04/08/2006

Topics in the theory of amorphous materials

D. Drabold (Ohio University, USA)

12/09/2006

First-principles modeling of elastic and inelastic transport in nanoscale junctions

T. Frederiksen (Technical University of Denmark, Denmark)

21/09/2006

Spin-orbit interaction in carbon nanotubes

L. Chico Gómez (Facultad Ciencias del Medio Ambiente, Toledo, Spain)

02/10/2006

Nanoscale imaging and spectroscopy with Scattering-type Near Field Optical Microscopy

R. Hillenbrand (Max-Planck-Institut, Martinsried, Germany)

11/10/2006

Ultrafast electron dynamics at interfaces beyond the equilibrium band structure

U. Bovensiepen (Freie Universität Berlin, Germany)

16/10/2006

Study of ion segregation at the NaCl/Water surface by scanning probe microscopy and X-ray spectroscopy. Implications for air pollution at coastal areas

A. Verdguer Prats (Institut Català de Nanotecnologia, Bellaterra, Spain)

07/11/2006

Molecular dynamics in thin polymer layers

F. Kremer (Universität Leipzig, Germany)

08/11/2006

Experiments with single polymer layers

F. Kremer (Universität Leipzig, Germany)

17/11/2006

New infrared glasses for photonic application

J. Lucas (Université de Rennes, France)

23/11/2006

Limits in cognition

S.R. Bosanac (Boskovic Institute, Zagreb, Croatia)

24/11/2006

New methods of functionalization of single-wall carbon nanotubes

F. Langa de la Puente (Universidad de Castilla la Mancha, Toledo, Spain)

28/11/2006

Time-resolved FTIR on nematic liquid crystalline elastomers (NLCE) under mechanical excitation

F. Kremer (Universität Leipzig, Germany)

30/11/2006

Scaling effects of tribological properties of silicate materials

P. Tordjeman (Université Montpellier 2, France)

15/12/2006

Molecular structure and electronic transport through monolayer molecular junctions

C. Ocal García (Instituto de Ciencia de Materiales de Madrid-CSIC, Spain)

20/12/2006

Organic semiconductors in model systems for plastic electronic devices

D. García de Oteyza (Max-Planck-Institut, Stuttgart, Germany)

11/01/2007

Exchange interactions and Curie temperatures of dilute magnetic semiconductors

Peter Dederichs (IFF-FZ, Forschungszentrum Jülich, Germany)

22/01/2007

QM/MM methods: an electronic and atomic view of Nature

V. Guallar Tasies (BSC, Barcelona Supercomputing Center, Barcelona, Spain)

23/01/2007

Discussion with young researchers. Science, Technology and Society:**The role of scientists**

H. Rohrer (IBM-Zürich, Switzerland)

26/01/2007

Confining photons by electromagnetic field enhancement

A. Bouhelier (Université de Bourgogne, Dijon, France)

07/02/2007

Ab initio calculation of photoemission spectra with the one-step theory

E. Krasovskii (Universität Kiel, Germany)

15/02/2007

A combined experimental (PALS and BDS) and theoretical (FV-TOP model) study on DEP

J. Bartos (Polymer Institute of SAS, Bratislava, Slovak Republic)

20/02/2007

Spectral properties of a low-dimensional correlated metal

D. Bozi (Instituto de Ciencia de Materiales de Madrid-CSIC, Madrid, Spain)

21/02/2007

Puntos de referencia para una ética de la biotecnología

C. Nombela Cano (Universidad Complutense de Madrid, Spain)

23/02/2007

Phonon induced inelastic light scattering

A. Mlayah (Université Paul Savatier, Toulouse, France)

07/03/2007

Ab initio study of calcium phosphate biomaterials

M.J. Stott (Queen's University, Kingston, Canada)

26/03/2007

Excitation of hydrogen subsystem in solids by external irradiation

I.P. Chernov (Tomsk Polytechnic University, Russia)

02/04/2007

Continuum quantum Monte Carlo calculations

R. Needs (University of Cambridge, United Kingdom)

12/04/2007

Second-order nonlinear optical properties of metal nanoparticles

Martti Kauranen (Tampere University of Technology, Finland)

13/04/2007

Stripe formation close to a critical point: Au on W(110)

Juan De la Figuera Bayón (Universidad Autónoma Madrid, Spain)

23/04/2007

Relaxation dynamics in glass forming liquids

M. Köhler (Universität Augsburg, Germany)

26/04/2007

Hot electron lifetimes in metals probed by time-resolved two-photon photoemission

Alexander Mönnich (Technische Universität Kaiserslautern, Germany)

04/05/2007

Quantum many-body systems: simulations and beyond

I. Cirac Sasturain (Max-Planck-Institut für Quantenoptik, Garching, Germany)

11/05/2007

The role of H,C,S and O impurities in the formation of gold nanowires

E. Anglada Varela (Universidad Autónoma Madrid, Spain)

17/05/2007

Probing reaction dynamics at metal surfaces with H₂ diffraction

D. Farias Tejerina (Universidad Autónoma Madrid, Spain)

17/05/2007

Probing reaction dynamics at metal surfaces with H₂ diffraction

D. Farias Tejerina (Universidad Autónoma Madrid, Spain)

24/05/2007

Water behavior at biological interfaces and in confined geometries

S.E. Pagnotta (Università Degli Studi Roma Tre, Italy)

28/05/2007

Protein production in *Aspergillus nidulans* — problems and improvements

M. Toews (Nadicom, Karlsruhe, Germany)

31/05/2007

New Polymeric Materials synthesized via coordination polymerization: recent examples from our group

P. Zinck (École Nationale Supérieure de Chimie, Lille, France)

05/06/2007

Magnetism in two dimensional structures: from C(110) to CeRhIn5

F. Yndurain Muñoz (Universidad Autónoma de Madrid, Spain)

13/06/2007

Homochiral spin-spirals at simple metallic surfaces

G. Bihlmayer (IFF-FZ, Forschungszentrum Jülich, Germany)

15/06/2007

Inelastic effects induced by electronic currents by wave-packet propagation

S. Monturet Caamaño (Université Paul Sabatier, Toulouse, France)

18/06/2007

Uso y abuso del concepto de índice de refracción efectivo en sistemas coloidales

R.G. Barrera (Instituto de Física, UNAM, México)

22/06/2007

Embedding in time-dependent systems

J. Inglesfield (University of Wales Cardiff, United Kingdom)

04/07/2007

Plastic deformation of gamma phase isotactic polypropilene in the plane-strain compression

E. Lezak (Polish Academy of Sciences, Lodz, Poland)

23/07/2007

Formation of a nano-sized ion-beam and a possible application to living all surgery

Y. Yamazaki (The University of Tokyo, Japan)

02/08/2007

H-bond percolation in supercritical water

M. Bernabei (Università Degli Studi Roma Tre, Italy)

07/09/2007

A single particle model to simulate the dynamics of entangled polymer melts

W. Briels (University of Twente, Enschede, The Netherlands)

11/09/2007

Free Volume from Computer Simulations

D. Racko (Slovak Academy of Sciences, Polymer Institute, Bratislava, Slovak Republic)

19/09/2007

Time resolved small angle neutron scattering as a tool to study kinetical processes of block copolymer micelles

R. Lund (IFF-FZ, Forschungszentrum Jülich, Germany)

21/09/2007

The Birth and Life of Block Copolymer Micelles as seen by Time Resolved Small Angle Scattering – from milli-seconds to years

R. Lund (IFF-FZ, Forschungszentrum Jülich, Germany)

24/09/2007

Comparison simulation/experiment in the Low Energy-Loss region: from lithium battery to gold nanowires

P. Moreau (Institut des Matériaux Jean Rouxel, Nantes, France)

24/09/2007

Irradiation-induced phenomena in carbon nano-materials

A. Krashennikov (University of Helsinki, Finland)

03/10/2007

Coherent Nuclear Vibrations in Solids and their Control with Phase-locked Optical Pulse Pairs

K. Ishioka (National Institute for Materials Science, Tsukuba, Japan)

08/10/2007

Kondo effect in transport through CoPc and TBrPP-Co adsorbed on metal surfaces: from kondo peaks to fano dips

E.L. Cereceda (Universidad de Alicante, Alicante, Spain)

16/10/2007

Photophysics of DNA building blocks

S. Brondsted Nielsen (University of Aarhus, Denmark)

17/10/2007

Hybrid functionals and local basis sets: an implementation in SIESTA

M. Hakala (Helsinki University of Technology, Finland)

19/10/2007

Radiation Physics and Monte Carlo simulation

F. Salvat Gavalda (Universidad de Barcelona, Spain)

24/10/2007

Structure and dynamics of the hydrogen bond network: from bulk water to ice and water at interfaces

M.V. Fernández Serra (CECAM-ENS Lyon, France)

27/11/2007

Ultrafast electron dynamics in surface bands

B. Gumhalter (University of Zagreb, Croatia)

12/12/2007

Carrier transport in Si and Ge Nanocrystals

C. Sevik (Bilkent University, Turkey)
