

## DIPC technical contract (Ref. 2018/38)

The Donostia International Physics Center DIPC is currently accepting applications for a technical contract under the title "Physics support for the NEXT project".

The aim of this contract is to offer support to the operation of the NEW detector currently taking data in the Laboratorio Subterráneo de Canfranc (LSC). The tasks will include monitoring the data taken by the detector, control of the detector Slow Controls and coordination of the teams participating in the data taking and analysis. The candidate should also participate and interact with other physicists within the NEXT collaboration.

We are looking for a motivated candidate with a degree in Physics, and with expertise in particle physics. Expertise in working with other group of people will be appreciated.

The candidate is expected to work in the LSC a large fraction of the time (70%).

Interested candidates please send an updated CV, a brief statement of interest, and contact information to [phd@dipc.org](mailto:phd@dipc.org). Reference letters are welcome but not indispensable.

Next review of applications is scheduled for October 16<sup>th</sup> 2018. Applications will be evaluated by a Committee designed by the DIPC board on the basis of the following criteria (with point weights indicated in parentheses):

- CV of the candidate (50%)
- Adequacy of the candidate's scientific background to the project (40%)
- Reference letters (10%)

The position will only be filled if a qualified candidate is found.

The DIPC could revoke its decision in case the candidate breaches the condition of joining before the deadline indicated in this call, proceeding in that case to grant the position to the next candidate based on the classification order, and provided that he has obtained a score higher than 50 (out of 100) in the evaluation of his candidature.

However, the selected candidate may keep the position if, in the opinion of the Evaluation Committee, he/she duly justifies the reasons why he/she can't join before the specified deadline, and as long as the project allows it.
